PROFILE

My name is Elián Matos Díaz, I am currently studying Software Engineering at INTEC. I am a quick learner, deeply dedicated to my passions and skilled at collaborating within a team. With a strong commitment to excellence, I continually seek opportunities to expand my experience. My skills are focused on web development, specifically in the position of Full-Stack Web Developer.

EXPERIENCE

Aug. 2024 - Oct. 2024 Santo Domingo, Dominican Republic	Intern as a Virtual Reality Tour Development Jeanette Chaljub - jeanette.chaljub@intec.edu.do My first approach in the realm of virtual reality at the INTEC Extended Reality Laboratory. Throughout this experience, I honed my skills in tools such as XML, KRPano, Photoshop, Blender, and RICOH 360° cameras, merging creativity with technology to create innovative projects. This position demanded effort, dedication, discipline, and collaboration, enhancing my capacity to work effectively and address technical challenges within a multidisciplinary team.
Sep. 2021 - Oct. 2021 Santo Domingo Dominican Republic	Intern as a Full-Stack Developer - F2TC Yohairo Vargas - (829) 983-0333 In this position, I gained comprehensive experience in both front-end and back-end technologies. On the front-end, I worked with Bootstrap and CSS to design responsive user interfaces, and used the MVC design pattern. On the back-end, I developed an application using Node.js with Express, implemented NoSQL databases with MongoDB and Mongoose, and managed web routing to ensure communication between the client and the server.
Nov. 2023 - Present Santo Domingo, Dominican Republic	Vice President - Software, Systems and Cybersecurity Engineering Student Committee Francia Mejía - (829) 341-2147 I organized technological events at INTEC, collaborating closely with the committee members. Additionally, I developed soft skills, such as public speaking and leadership, in professional settings.

SKILLS

ReactJS	.NET	JavaScript	Node.js	MongoDB
SQL	Git & GitHub	Github Actions	Firebase	Vue.js
Express.js	Scrum	Django	Docker
